EDUCATION

Arizona State University, Tempe, AZ

Master's Degree in Software Engineering

Aug 2025 - May 2027

Indian Institute of Information Technology Bhopal, India

B.Tech in Computer Science & Engineering

Aug 2017 - April 2021

EXPERIENCE

Software Engineer, OpenEnvoy, India

Apr 2024 - Sept 2025

- Developed Python integrations for ERPs such as QuickBooks, Oracle Fusion, FuelMe, and RentalMan to facilitate automated financial reconciliations.
- Developed a weight-based ingestion strategy to reduce PostgreSQL writes by 80%.
- Re-architected data sync pipeline to reduce sync latency by 50%.

Co-Founder & CTO, QuickWage.in, India

Apr 2023 - Sept 2024

- Built and launched the MVP for a lending partner onboarding platform that allows financial institutions to integrate their lending workflows.
- Architected backend services using NestJS, PostgreSQL, and Redis for production workloads with 99.9% uptime.
- Set up CI/CD pipelines using GitHub Actions, Docker, and Kubernetes (Helm).

Software Engineer, Rudderstack, India

Sept 2023 - Mar 2024

- Optimized CDP transformations with Python and JavaScript to reduce processing latency by 30%.
- Automated deployments with Helm on AWS EKS to ensure reliability in production deployments.
- Developed observability dashboards with Grafana and Prometheus to monitor system latency.
- Designed and implemented a state store with Redis to boost data access performance by 3x.

Software Engineer, Open Financial, India

Aug 2022 - Apr 2023

- Developed backend services for lending products which saw 3x growth within two months.
- Designed internal admin portal with real-time analytics improving operational visibility.
- Designed Kafka event pipeline with Freshworks integration resulting in 40% reduction in support resolution time.

Software Engineer, Niyo Solutions, India

Feb 2021 - Aug 2022

- Migrated internal tools from PHP to React improving maintainability and performance.
- Developed backend APIs for NiyoGlobal onboarding platform supporting 2M+ customers.

SKILLS

Languages	TypeScript, JavaScript, Go, Python
Backend	Node.js, NestJS, Express, Fastify, Koa, REST APIs, Microservices
Cloud & DevOps	AWS (EC2, EKS, RDS, Route53), Docker, Kubernetes, Terraform, Helm, GitHub Actions
Databases & Messaging	PostgreSQL, Redis, Kafka, RabbitMQ, DragonflyDB, InfluxDB
Observability & Monitoring	Prometheus, Grafana, Elasticsearch, Kibana, New Relic, Sumo Logic
Testing	Unit Testing, Integration Testing, End-to-End Testing

PROJECTS

SportsHub – Sports Facility Booking Platform | Fullstack Freelance Engineer, WHS Sports Hub (Commercial)

Sept 2020 - July 2021

- Designed and developed a sports booking application using MERN stack with real-time slot availability and Razorpay payment gateway integration.
- Developed admin dashboard for scheduling, price management, and booking overrides, increasing efficiency by 70%.
- Implemented JWT authentication, Docker deployment, and analytics for operational insights.
- The platform is live for over 3 years, processing transactions of over \$200K+ and serving 5K+ active users.

Financial Banking System | Personal Project

- Developed a desktop banking application in Visual Studio for loan, interest, and amortization calculations.
- Implemented secure authentication, report generation, and export features to improve financial reporting workflows.
